

Belt Clip

NBC-SNT

Available as Dual-Tech or IR only

Keyfob

KFS

IR only

Neck Pendant

APEN-BRB

Available as Dual-Tech or IR only

Description:

If a system has Ceiling Units (CU) or the call points have had the Infrared upgrade (-IR) then the use of these Infrared trigger devices allows additional functionality.

Each unit has the ability to send a "staff assistance", "emergency" and "reset" call via Infrared signals to a room sensor, with the Dual-Tech devices also sending a radio signal back to the panel as well.

The system will show which Infrared device has been triggered along with the room device that reported it allowing accurate location of an incident.

The belt clip unit has the anti-snatch cord upgrade available so that when the device is forcibly removed from the belt, the pin on the cord is removed which automatically sends an emergency call.

The neck pendant has a similar function built into the neck cord as a tug connector, which also acts as an anti-ligature point should the pendant get caught.

The keyfobs are Infrared only devices so are not available with Dual-Tech functionality. The lanyard on the keyfobs also has an anti-ligature point should it get caught.

Levels of Call that can be sent:

- o Staff Call
- o Emergency
- o Reset/ Staff Presence
- o Low Battery (not IR only versions)

Technical Specification:

- o Built in Infrared LED transmitters
- o Radio transmitter (Dual-Tech only)
- o Conforms to BS6799 Class VI (Dual-Tech only)
- o Effective radiated power: 10mW output, approved to MPT1344 licence exempt (Dual-Tech only)

In pursuance of a policy of continued improvement, the company reserves the right to change the design and specification without prior notice
